THE POWER OF ONE

Create and Deliver Custom ID Cards

ONE CARD™

CUSTOMIZE ID CARDS

Create, order, produce and track ID cards

Our ONEcard solution enables you to create and deliver highly customized ID cards for your target audience, and control your production process from card design, proofing, ordering and tracking. Stakeholders can create templates, edit and proof each ID card, hold, suppress, redirect entire files, or groups of ID cards, all within the framework of our sophisticated approval workflow. ONEcard also archives all ID cards for 10 years, and allows you to retrieve any member's card at any time. eDelivery via a smart phone app or delivered to a client website is core to ONEcard.

O'Neil is here to help

O'Neil will manage your entire ID card workflow, from creation, approval, and eDelivery and physical creation and delivery. We produce millions of full-color, Teslin and plastic ID cards, with a variety of carriers.

Request a demo

Please call for a demo of our ONEcard online ordering system. Find out why some of the largest healthcare organizations trust O'Neil with their ID card production.

ONEcard features include:

- Manage your ID card templates
- Edit and proof each card
- Hold, suppress, redirect and approve cards
- Control the ordering process
- Track each order in real-time
- Archive ID cards for immediate retrieval and viewing
